

protector**Citrus**

NATURAL PLANTS DEFENSES ACTIVATOR IN CITRUS

WHAT IS PROTECTOR?

PROTECTOR is a product designed by Aspe Agrobiológico. It's established as an organic product of vegetable origin. Its great purity and quick absorption in different tissues vegetable PROTECTOR make an essential product for the growth, maintenance and protection of plants.

BENEFITS PROVIDED BY PROTECTOR TO CITRUS

IMPROVEMENT:

THE GROWTH
PERFORMANCE, EFFICIENCY.
PRODUCTION.
BEST BORN.
FRUIT SET.
STRONGER BLADES.
LARGEST NUMBER OF FLOWERS.
FRUIT: LARGER, UNIFORMS, REDUCES THE CRACKING.
ACTIVATED DEFENSES.
IT PROVIDES ESSENTIAL MICRONUTRIENTS.

SPECIFIC ADVANTAGES:

GOOD REGENERATING EFFECT, AND HEALING IN VARIETY NAVELL

WHY MUST OPERATE PROTECTOR?

PROTECTOR is a compound that provides numerous plants benefits. Thanks to its composition presents lignosulphate of aluminum, organic acids and microelements, triggers a rapid response of the immune system to different infectious agents. In the plants increases of antioxidants and toalexins.

Antioxidants are concentrated in the chloroplast, and protect the appliance photosynthetic when a plant is subject to stress and eliminate the free radicals that they are harmful to the plant tissue.

On the other hand, increases the level of toalexins. The toalexins are metabolites side synthesized from new that they provide to the plant anti-microbial mechanisms.

WHAT IS THE COMPOSITION SHOW?

COMPOSITION	% w/w	% w/v
Nitrogen Total (N)	5	6,5
Urea Nitrogen (N)	5	6,5
Zinc complexed by water (Zn)	1	1,3
Manganese complexed by water (Mn)	2	2,6
Copper complexed by water (Cu)	2	2,6
Density		1,25
pH		2,95

Complexing agents: aluminum lignosulfonate and gluconic acids.

PACKAGING

Soil application in plantlet:

APLICACION	SEASON	DOSES	BENEFITS
1º BEGINNING OF SPROUTING	SPRING	5-10 cc/plant	PROMOTES GROWTH IMPROVES ROOTING
2º BEGINNING OF SPROUTING	SUMMER	5-10 cc/plant	IMPROVEMENT AFFINITY PLANTLET / GRAFT SPP PHYTOPHTHORA CONTROL

Foliar application in adult trees:

APLICACION	SEASON	DOSES	BENEFITS
1º BEGINNING OF FLOWERING	SPRING ESENTIAL	2-3 L/1.000L	STIMULATES SPROUTING GOOD SURFACE BALANCE , VEGETATIVE AND NUMBER OF FLOWERS GOOD CURD SPP PHYTOPHTHORA CONTROL
2º BEGINNING OF SPROUTING	SUMMER IMPORTANT	2-3 L/1.000L	FAVORS BLOOMING FOR NEXT YEAR AVOID YOUNG FRUITS FALL SKIN STRENGTHENING
3º BEGINNING OF FRUIT VERAISON	WINTER VERY IMPORT.	2-3 L/1.000L	BLOOM REGULATING OF THE NEXT YEAR (NAVEL) STRONGER PEDUNCLES GOOD BALANCE LEAF AREA/NUMBER OF FLOWERS SPP PHYTOPHTHORA CONTROL IMPROVE FRUIT SKIN QUALITY

Use at least 4L/Ha with a volume of 2.000L water
